Introduction to Contact Lenses

This Leaflet is intended to give you a brief introduction to contact lenses and our Care Scheme.

For more detailed information and advice we would recommend coming to see us for a preliminary examination at which you will be able to discuss your individual requirements more fully.

What We Offer

- Professional Consultations with one of our fully qualified Opticians.
- Independent and impartial advice on which type of contact lens best suits your needs.
- Continuing aftercare and advice.

and
Information

Soft Lenses

Soft Lenses are often comfortable to wear from day one. They are made from a sponge like plastic which allows air to pass through to the eye.

Due to their immediate comfort they can be used for part time wear e.g. sports use or social occasions. Soft lenses need replacing regularly and are often supplied in frequent replacement form. These lenses are able to be made thinner than standard lenses. This means they are more comfortable, allow even more oxygen to the eye and are easier to clean.

The ultimate in Soft Lens technology is the **One Day Disposable Lens**. As the name suggests the lens is designed to last just one day. Which means no more cleaning.

Gas Permeable Lenses

Gas permeable lenses are made from a rigid plastic material which allows oxygen to pass through to the eye.

A wide variety of different materials are used and all have different characteristics. The Optician will recommend the type of lens that is most suitable for your eyes.

With gas permeable lenses your wearing time is built up gradually. This enables the eye to adapt to the physical presence of the lens on the eye.

Price List

1. All necessary contact lens appointments are covered for no extra charge.
2. Contact lenses are supplied at reduced cost.
3. All complete spectacles or sunglasses purchased receive 20% discount.
4. Your routine eye examination every 2 years is at no extra charge.
5. Retinal photography free with eye examination normally £10.00 charge
6. Damaged or lost lenses replaced at reduced cost.
7. Prices correct at time of printing.

Aftercare

Whichever type of contact lens you have this is the most important part of contact lens wear. Aftercare visits should be no more than one year apart and are vital for spotting potentially serious complications which are often unnoticeable to contact lens wearers.

And Finally...

We can also supply contact lenses without using the Care Scheme package. Please ask for more details.
